

Sprint 10: 4/3/2023 - 4/9/2023

4/4/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	DAY-OFF	Start on the LLD for comparing the cost of different services
Anh	No	Day-off	Start LLD for Calendar implementation.
Aster	No	I had day off	I will continue researching on how to work with signing for a document.
David	No	I did not do anything other than scrum preparation.	I will work on the LLD for Crime alerts to create a new crime alert.
Sierra	No	Day-off	I am going to refactor my code for the request and service dao and get rid of repetitive code.

4/5/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	Created the first draft of the main success case for M&R.	Finish the second success case and start on failure cases for M&R.
Anh	No	Start LLD for Calendar implementation.	Continue LLD for Calendar implementation.
Aster	No	I researched on how to make signatures on javascript	I have planned day off.
David	No	I worked on the LLD for Crime Alerts Map to make a new crime alert.	I will continue the LLD and try to finish it and get to designing the Frontend using figma if I have enough time.
Sierra	No	I started refactoring my code and separating user service and request management. I moved the interfaces and added service management.	I am going to continue refactoring code and fix my unit and integration test.

4/6/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	Finished working on the second success case for M&R.	Finish the Failure cases for M&R.
Anh	No	Continue LLD for Calendar implementation.	Day-off
Aster	No	I had day off	I will start working on the fixing of the Document Storage Sign LLD
David	No	I finished a first draft LLD for Crime Alert Map to make a new Crime Alert.	I will work on the frontend using figma to design how the form would look to make a new crime alert.
Sierra	No	I refactored the code by reorganizing the interfaces, fixing the name spaces and creating new integration test and adding clean up for old test.	I am going to start on a LLD design for Usage Analysis Dashboard

4/7/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	Finished all the success and failure cases for M&R	Due to low capacity, I will read the code service management, needed to implement M&R
Anh	no	Day-off	Continue LLD for Calendar implementation and take a look at the git branch to make some tweaks.
Aster	No	I have fixed half of the Document Storage Sign LLD	I will finalize the Document Storage Sign LLD
David	No	I started of the front end design for Crime alert but was not completed yet.	I will complete the front end design of the Crime alert to add a new alert and then start with coding if I have time.
Sierra	No	I started on the LLD for Usage Analysis Dashboard	I am going to finish the LLD for Usage Analysis logins and registrations per day

Sierra	No	I started on the LLD for Usage Analysis Dashboard	I am going to finish the LLD for Usage Analysis logins and registrations per day
4/8/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	Spent time reading the Controller, Manager, and Service layer of Service Management.	Day off due to meeting with another team project.
Anh	No	Continue LLD for Calendar implementation and take a look at the git branch to make some tweaks.	day-off
Aster	No	i finished document storage sign lld	I will research on how to code in C# as well as other necessary forms of coding required by professor
David	No	I was able to complete only the front end design for making a new crime alert.	I will begin back end code starting with the controller and manager to make a new crime alert. If i have time I will also work on service and DAO layers.
Sierra	Yes	I was not able to finish the LLD for Usage Analysis Dashboard for logins because I'm not sure how to get the login stats	I am going to research more and ask questions about our design to learn how to incorporate login in stats into the webapp
4/9/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	Day Off	I realized a design problem while checking the earlier draft of M&R, where I dont know what types of services are available, and cost is not being stored. So I will change the design to include these things.
Anh	No	day-off	Continue LLD for Calendar implementation and plan code implementation.
Aster	No	I researched group member's code to see how to properly code the backend	I will continue researching other group member's code to code backend and frontend if possible.
David	No	I began backend code for crime alert to just add a new crime alert.	I will try to finish the backend and then start the front end. If I have time I will try to create test for backend first then end to end test later.
Sierra	No	I figured out how I am going to get the login in stats and completed the LLD for Usage Analysis Dashboard	I am going to refactor code again for service management, add a loggerDAO and database.
