

Sprint 9: 4/4/2023 - 4/9/2023**What went well?**

Abhay	I finished 2 out of 3 planned design.
Anh	I made progress on my assignments, which were the LLD for Calendar.
Aster	I am finished with LLD and also recovered better mental state than previous sprints
David	I made good progress with the backend of crime alert and a bare mininum front end for only the single function of crime alert.The team is getting better with scrum and our completion rate is better.
Sierra	I was able to finish the LLD for Usage Analysis Dashboard logins per day and registrations per day earlier than expected. I then started on the backend implementation of Usage Analysis Dashboard. The team is also improving their communications and participating in scrum activities.

What went wrong? / what could be improved?

Abhay	I got blocked on the last design for Estimate Project, where I need to reconfigure another feature.
Anh	The project files are a little bit of a mess. I had some trouble navigating through the directories because the naming conventions are inconsistent. I know my team used VS so their solution view was more cohesive compared to using VSCode.
Aster	I am going to start coding backend starting next sprint, but I do not feel confident in my ability to code properly and securely
David	I got stuck on the end and wasted time with database bugs causing it not to work completely so I did not finish my tasks due to the database issues which I should be able to resolve in 1 or 2 more hours.
Sierra	The backend directory has many unused project files and and different versions of the webapp which causes confusion between the team and using the not most updated project files.

How can we improve?

Abhay	I am going to talk to professor, and teammates to way to figure out how to reconfigure Property Evaluation, and desgin Estimate Project.
Anh	Being forced to email the professor simultaneously has greatly improved our planning; as a group we need to keep this up for better team cohesiveness.
Aster	I will continually compare my code to other group members' codes and learn from their ways. I will spend 1-2 more hours than previous sprints on each day I work dedicating to researching and comparing.
David	I will create a new database set-up document to make it easier to set up the database when moving to new computers. This will stop some database errors that are casused from improper databases.
Sierra	We can improve by reorganizing main to only include the used and relevant project files and make sure that everyone has the updated project.

Team Target Percent Completion for next sprint

For completion of next round of assigned features:		150	Hours
Calendar	As a User, I will be able to view my existing appointments on the calendar.		25
Calendar	As a User, I will be able to add or remove appointments on my calendar.		25
Crime Alert	As a User, I will be able to delete crime alerts that I created.		25
Document Storage	As a User, I will be able to upload documents to my storage.		20
Maintenance and Renovation	As a User, I will be able to edit projects that I created.		15
Maintenance and Renovation	As a User, I will be able to delete projects that I created.		15
Maintenance and Renovation	As a User, I will be view a price chart for services and projects.		15
Service Management	As a Property Manager, I will be able to view my past service ratings.		20
Service Management	As a Property Manager, I will be able to request a frequency rate change for a current service.		20
Service Management	As a Property Manager, I will be able to request a service cancellation for a current service.		20
