

Sprint 11: 4/10/2023 - 4/16/2023

4/10/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	Yes	Communicated to my teammate Sierra, to add Service Price to here feature Service Management, and strated the LLD for Add Project, and Estimate Project. Where I need to reconfigure Property Evaluation somehow to implement Estimate Project.	Figure out how to reconfigure and design Estimate Project.
Anh	no	Continue LLD for Calendar implementation and plan code implementation.	Day-off
Aster	no	I researched Sierra and David's backend code	I have a planned day off
David	Yes	I got stuck on database and dao issues. I was able to complete a big chunk of the backend code.	I will start on a front end design for the crime alert to view an alert.
Sierra	No	I refactored the code for service management frontend and added rate a service, added a loggerDAO and database.	I am going to start implementing Usage Analysis Dashboard for logins and registrations backend.
4/11/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	NO	Added tags to Property Evaluation, where they can include stuff like Swimming Pool, etc which can potentially change Property Value.	My day-off, because I need to spend time finishing other assignments.
Anh	no	day off	start Crud implementation on Appointments controller.
Aster	no	I had a day off	I will start the backend code for Document Storage Upload
David	No	I started on front end design and is almost done with it I just need a few more details that I can complete in about 30 minutes more of work	I will start the LLD success and failure cases for viewing the crime alert details only.
Sierra	No	I started to implement Usage Analysis Dashboard for logins and registrations backend.	I will start the LLD for Service Management frequency change and refactored the LLD for rate a service and service request.
4/12/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	Yes	Day-off	Still stuck on Estimate Project, but I am going to finish LLD for Add Project today.
Anh	no	start Crud implementation on Appointments controller.	continue crud implentation and endpoints on Appointments microservice
Aster	no	I started on the backend of the Document Storage Upload	I have a planned day off
David	No	I started the LLD design for the view of a single crime alert details.	I will be working on LLD design for viewing a single crime alert in detail.
Sierra	No	I started the LLD for Service Management frequency change and refactored the LLD for rate a service and service request.	I am going to finish the LLD for Service Management and start implementation of the backend frequency change user story
4/13/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	Finished Add Project LLD, and talked to teammates and Supervisor. Where they advised to limit the scope to implement Estimate Project.	I will start on Edit Project and Delete Project.
Anh	no	continue crud implentation and endpoints on Appointments microservice	day off
Aster	no	I had planned day off	I will continue where I left off on backend code for Document Storage Upload
David	No	I worked on LLDs and have to work on other LLD for crime alert to finish them all for peer review.	I will try to finish up all the LLD by today or try to get most of them done for crime alert feature.
Sierra	No	I finishe dthe LLD for service Management and started the implementation of backend	I am going to finish the backend implementation of service management, test it and

Sierra	NO	frequency change.	logging and refactor frontend by sepearting script files for each service.
4/14/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	I have completed Edit Project and Delete Project LLDs	Start on Price Charts LLD
Anh	no	day off	implement migrations and complete crud of appointments controller
Aster	no	I was coding backend and was figuring out how to code from the microservice to DAO and DAO to data store	I will continue to work on the backend on the Document Storage Upload
David	No	I was still working on LLDs for peer review fro crime alert.	Day Off.
Sierra	No	I finished backend implementation of service management.	I am going to test service management and logging and refactor the frontend script files.
4/15/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	Finished with success cases for Price Chart LLD	Finish Failure cases and wireframe for Price Charts.
Anh	no	implement migrations and complete crud of appointments controller	day off
Aster	no	I am slowly working on the backend for Document Storage Upload but it is taking longer than expected	I will continue to work on the backend of the Document Storage Upload
David	No	Yesterday was a planned day off so I did no work.	I will start my peer review and if I have time I will start on coding the crime alert view.
Sierra	No	I tested service management and logging and refactored the frontend script files	I am going to add service management to the frontend.
4/16/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	Complete LLD for Price Charts, with that the feature is designed.	Peer Review Sierra's Feature.
Anh	no	day off	continue migrations and complete crud of appointments controller
Aster	no	I worked on the Document Storage Upload backend.	I will do peer review for Anh's Calendar feature as well as work on the Document Storage Upload backend
David	No	I started my peer review and was able to do a large part of it but was unable to finish it in one day.	I will finish my peer review and If I finish early I will work on coding crime alert view.
Sierra	YES	I started to add service management to the frontned but was not able to finish due to an unexpected error in the backend.	Fix the error and continue to update the frontend with service management. I am also going to to peer review Davids feature.
