3/20/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	Made a middleware that handles preflight and returns correct headers. Which fixed the error with CORS.	I am going to fix how the cookie stores claims, which is not working as intended.
Anh	No	Attempt to add unit tests for Service Management - Service Request	Day Off
Aster	No	I finished LLD for Document Storage Delete failure cases	I have day off
David	No	I continued to bugfix code and made some progress following teammates work in github.	I will work on scrum documents and also try to continue fixing code and adding more validation and error handling.
Sierra	No	Refcatored the frontend to include request management.	Finish my request management intergration test.

3/21/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	Tried several ways of serializing the claims.but was not successful. Elevated the issue to my supervisor, thy suggested an solution.	I had to take a day off because of midterm which was scheduled for Thursday, got rescheduled for Tuesday.
Anh	no	Day Off	Frontend UI for my features.
Aster	no	I had day off	I will check the HLD again and see what I have done wrong.
David	No	I worked on scrum documents and did a little code fixing and attempted to add more validation and error handling but little progress was made due to time.	I am going to work on fixing scrum documents starting with adjusting and reorganizing the project backlog and move more user stories from parking lot to backlog.
Sierra	No	I completed my intergration test and refactored my request management frontend code.	I am going to add account deletion to the web app and it to the frontend along with the navigation bar, and registration.

3/22/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	Day Off	I am going to implement fix to serializning claims. Following my supervisor's solution I will create an JWT token with the claims, and serializing it.
Anh	no	Frontend UI for my features.	Day Off
Aster	no	I reviewed HLD and compared with the LLD I previously made	I have day off
David	No	I made some changes to the backlog but was not able to make much as I didn't have alot of time yesterday.	I will continue to work on fixing scrum documents project backlog and move more user stories from parking lot to backlog.
Sierra	No	I added the side navigation bar to frontend and fixed the error "Exception thrown: 'System.Data.SqlClient.SqlException' in System.Data.dll " i was getting when I tried to get rows from the database	I am going to add account deletion to the web app, and javascript for the request management page and hopefully add account deletion to the frontend.

3/23/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	I implemented the solution for serializing claims, using JWT tokens.	I am going to test and fix any error with the frontend.
Anh	no	Day Off	Research on frontend making REST calls to the backend.
Aster	No	I had day off	I am unable to work due to power outage
David	No	I was able to rewrite some userstories and reorganize part of the project backlog but not able to complete it as I also worked a little of DIY Code also.	I will unexpectedly busy and unable to work on tasks.
Sierra	No	I added event listeners to the javascript for request management and account deletion to the webapp.	I am going to add account deletion to the frontend and then I can start on frontend testing for request management.

3/24/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	I was able to fix all the error with my frontend.	I will refactoring my frontend according to my tests.
Anh	no	Research on frontend making REST calls to the backend.	Day Off
Aster	No	I was unable to work	I am unlikely to be able to work again due to internet outage
David	No	I was unexpectedly busy and unable to work on tasks.	I will continue editing scrum and also work a little of DIY Code if I have time.
Sierra	Yes	I added account deletion to the frontend and hosted the website but I get an 404 error when I try to connect to the swagger ui/backend.	I am going to research the error and try to get the frontend and backend running to gether and hopefully move on to testing for requets management.

3/25/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	NO	I completed refactoring my frontend code to work with tests, and all them pass now.	I will reserch how to create integration tests.
Anh		Day Off	Research Postman integration testing
Aster	no	I was unable to work	I will go through the Document Storage Search LLD's to go through fix wrong parts
David	Yes	I was only able to work on DIY Code making some unit test but was having errors trying to make integration tests.	I will work on editing the front end of the DIY and continue research for how to better sort.
Sierra	Yes	I was able to fix the error and get the frontend and backend running together and upate the request managemnet frontend by dynammically filling in the html with request from the database but came across an TypeError because the controller is returning an object which is undefined forEach method.	I am going to research the error and continue to update my request management frontend.

3/26/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	I spent my time creating test integration tests, while researching on google and youtube videos.	I will create integration tests, and refactor the frontend if neeeded.
Anh	no	Research Postman integration testing	Work on backend code for service management
Aster	no	I changed the two of Document Storage Search LLD's to match with the HLD	I will continue to go through the remaining Document Storage Search LLD's to fix wrong parts.
David	Yes	Not much work got done as I kept making changes and then re-changing them and I planned on spending more time on it but ended up busy with outside responsibilities.	I worked on some scrum documents and finish DIY if possible.
Sierra	Yes	I researched the error but still have not found a solution that works so I still am getting the same error.	I still am getting the same error hopefully I can fix it and start making a end to end test for frontend.
