3/13/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	I started working on the frontend, which was not extensible enough. So I had to stop debugging the backend, because of the authentication error.	Fix the authentication error, where the cookie is not being set correctly.
Anh	no	Planned with the team the following sprint.	N/A
Aster	No	I almost finished the Document Storage Sign failure LLD	I have a planned day off.
David	Yes	I started to make test for my DIY Manager but they were failing so I think I needed to go back to fix the code.	I will go back and fix code to make my unit tests that are testing the DAO work.
Sierra	Yes	I started working on the frontend for registration and request management but came across a status code 415 error and made little progress.	I am going to research the error and continue working on frontend for my feature and registration.

3/14/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	After figuring out that swagger will not allow to set cookies with their API, and the frontend not working. I started creating a new frontend.	I will pick up from yesterday, and will complete the frontend framework. Connect it to the frontend.
Anh	no	N/A	Start working on Service Management - Service Rating
Aster	no	I had a planned day off.	I will finish Document Storage Sign failure LLD and check up on HLD.
David	No	I unexpectly got busy with personal matters and did not accomplish much work as I was planning on going back to fix code to make the unit test work.	I will once again try to go back into the code and find the error that is causing my unit test for my DAO Layer to fail.
Sierra	No	Day Off	Day Off

3/15/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	I created a whole new frontend for the team, where it is extensible enough so all the team memebers can create frontend in a integrated manner.	Connect the backend to the frontend, and fix all the errors with the failing tests.
Anh	no	Start working on Service Management - Service Rating	N/A
Aster	no	I finished Document Storage Sign failure LLD and reviewed HLD	I have planned day off.
David	No	I fixed all the error and have all my unit test for my DAO working and fixed the bug in search and now I am able to view the search results in DIY.	I will try to start unit testing on other layers starting with the service layer.
Sierra	Yes	Found that the error was an unsupported media type client error and try different ways to fix it but none worked.	I am going to update my resume and continue to work on frontend

3/16/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	Yes	Tried connecting the frontend to the backend, couldnt because of the CORS error. And successfully fixed all the failing tests.	DAY OFF
Anh	no	N/A	Return to Service Management - Service Request and work on a front end for it.
Aster	no	I had planned day off.	I will continue reviewing HLD.
David	No	I created some new test but found out by the professor that DAO tests should not be unit tests so all my new unit test are incorrect and I will have to make it integration tests.	I will try to research how to integrate my Account Recovery Code into everyone else projects.
Sierra	Yes	I updated my resume and acontinue to add to my frontend.	I have not yet fixed the error so I am moved on for now and continued to add to my feature to frontend and create a side navigation bar.

3/17/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	Yes	DAY OFF	I was stuck with cors error, and other errors. Where even in no-cors mode, there was an 415 error.
Anh		Return to Service Management - Service Request and work on a front end for it.	Try and work on a frontend for my tasks
Aster	no	I reviewed HLD design and compared to the LLD I have made previously to check the mistakes.	I will work on LLD success case for Document Storage Delete
David	Yes	I was stuck researching how to update my code to work with others but I also had too little time to spend trying.	I will work on intergrating code with the other team members code to make an unified project.
Sierra	Yes	I created a side navigation bar that includes all of our features and a admin tab for admnistrative core requirements.	I am going to continue to work on my frontend by dynamically adding rows from the database for service request. I am also going to make integrated test for my feature.

3/18/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	Yes	I fixed the 415 error in no-cors mode, where now return or response work properly.	I will fix the cors error, where it says the origin is allowed.
Anh	no	Try and work on a frontend for my tasks	Implement my Service Management - Service Rating in the backend
Aster	no	I worked on Document Storage Delete succcess case LLD	I will work on Document Storage Delete failure case 1 and 2 LLD
David	Yes	I was having a similar problem to Sierra of connecting front end to backend with the new style of coding.	I will continue bug fixing my code to get it integrated along with other code.
Sierra	Yes/No	I started integrated test for request management and prepared my frontend to receive service request from the backend.	I am going to research more about ajax and fetch and hopefully fix the error Ive been getting so I can start testing the frontend.

3/19/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	Yes	Will limited time, I tried debugging the cors error where I found that the response does not have the headers I want.	Make an middleware to handle cors, because the request is not hitting the controllers. Which is giving me an error.
Anh	no	Implement my Service Management - Service Rating in the backend	Attempt to add unit tests for Service Management - Service Request
Aster	no	I finished Document Storage Delete failure case 1 and started up case 2	I will finish Document Storage Delete failure case 2 and 3
David	Yes	Alot of my code changes I made lead to more errors and bugs breaking my Account recovery and DIY manager when it was already working before.	I will attempt code fixes where most of my errors are front end to backend related and then rebuild my front end to match my front end design that I planned.
Sierra	Yes	I finished my intergration test for request management.	I am going to continue to work on the frontend of the website by adding event listeners to js.
