Sprint 8: 3/20/2023 - 3/26/2023									
What went well?									
Abhay	Frontend is completed and everything is working properly. With the finishing of the frontend, I am completed with Property Evaluation.								
Anh									
Aster	I believe the communication issue Sierra has continually been commenting on has been getting better over time for most of the group members. Making decision as a group became quicker and we respond when someone needs our attention usually within 30 minutes.								
David	I was able to work on alot of the scrum documents to help make future sprint planning easier. I was also able to make progress with my code.								
Sierra	I was able to figure out the errors that I recieved while developing the frontend and helped create a foundation that every can build upon for our seperate features.								
What went wrong? / what could be improved?									
Abhay	Anh has been missing last 2 sprint planning, and we assumed he was doing what he was assigned and worked according to planning. Which turned out to be false. And my capacity was cut in half due to me not realizing I had 2 midterms this sprint.								
Anh									
Aster	We may still need to work with communication especially with Anh, who does not seem to respond often in the group chat.								
David	Ahn's participation has been lacking and it seems hes been giving out false information as when asked if he was done with a task he would state that he was done or almost done and will upload it later. But we recently found out that he has no work accomplished. I also was not able to finish my tasks as I was busier than normal with outside responsibilities.								
Sierra	Unexpected errors and lack of knowledge of frontend developement stalled feature completion and put us behind schedule. Hopefully after countering so many errors we will be better suited for the next round of feature developement.								
How can we improve?									

Abhay	We have escaled the issue with supervisor. And luckily during sprink break I will cover the uncompleted work from last sprint. I plan to finish the uncompleted work in first 2 days of the sprint.
Anh	
Aster	As we are currently not able to meet up in person due to spring break, we will have to go over with this as a group in the sprint planning and get an understanding of what to do without him. Either Anh gets back on his communication just like other members in responding within 30 minutes in the group chat or someone will need to take over his spot. At worst, we may have to let the features undeveloped due to lack of time.
David	This next sprint will be spring break meaning I will have more chance to meet the amount of work I want to do and I finished other outside responsibilities so that will free up my schedule also. I will attempt to spend at least 1 more hour than plan each day if possible so I can get ahead of schedule. I will also ask for more assistant from teammates whenever I encounter a problem.
Sierra	We can improve by encouraging each other to ask for help and by offering help to each other. This will help speed up the development process and ensure everyone knows of any development decisions made.

Team Target Percent Completion for next sprint

Request Management, Property Evalution, DIY Manager, Service Management 100%

Concrete Action Plan To Succeed In Reaching Target Completeing By Next Sprint
