2/13/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	I had my scheduled day off.	Fix the CORS error after going to class, and understand the flow of technology.
Anh	No	I had my scheduled day off.	Day off
Aster	No	I researched how the code is made in this group	I have a planned day off.
David	No	I finished making all the LLD designs for Account Recovery.	I will try to build code for the user to request and OTP using their Email.
Sierra	No	Researched how to connect the frontend and backend	Added css to my frontend Javascript project

2/14/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	Finally fixed the CORS error, and understood basic flow and function of async request from a frontend to the backend.	I am having my scheduled day off.
Anh	No	I had my scheduled day off.	revisit logging
Aster	Yes	Yesterday was a day off.	I will make LLD design for Document Storage - Success Case
David	No	I was able to write code to get a User's email and check if they exist to send an OTP.	I am going to clean up my current code to better follow SOLID principle.
Sierra	No	Added ccs to my frontend Javascript project by creating making buttons to pull up login and registration forms	Researched javascript and how to connect the JS project to a Web API project and to the database

2/15/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	I had my scheduled day off.	Get started on converting the Low Level Design for the Console Authentication service, to use http.
Anh	No	revisit logging	logging dependency injection
Aster	Yes	I started on making LLD design for Document Storage - Success Case	I am having my scheduled day off.
David	No	I made minor changes to the code to make it more reusable.	I am going to make the code to generate an OTP to send to a User. I will also try to make the code to automatically send the OTP by email.
Sierra	No	I did more research on javascript and ajax calls. I also updated the LLD designs to include the front end	Add more css to my front end project and research ajax calls to connect frontend to the server

2/16/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	Started converting the LLD for a webapi from an console application.	Day off
Anh	No	logging dependency injection	logging dependency injection
Aster	Yes	I had my scheduled day off.	I have an emergency to take care of, so I will take day off
David	Yes	I was able to make the OTP but had issues with automatic email sending.	I am going to clean up my current code and then research help on how to send automatic emails.
Sierra	Yes	Added a forgot password button to the frontend web app for account recovery	Added my backend code and javascript project to a new Web API project

2/17/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	Day off	Complete the Low Level Design for Authentication, and get started on Tests for Authentication.
Anh	No	logging dependency injection	logging to a file
Aster	No	I had a emergency day off	I will continue making Document Storage Success Case LLD
David	No	I removed an error message and did a little research on how to automatically send emails.	I will further research how to automatically send emails and try to start implementing the code for it.
Sierra	Yes	Created a Web API application on vs and added my JavaScript Project and backend code to it	Continue to research and update my Web API project with ajax calls to the server

2/18/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	Completed the LLD for Authentication. And started researching how to make Tests.	I will make tests for the authentication service.
Anh	No	logging to a file	refactor logging design
Aster	No	I continued making Document Storage Success Case LLD	I will work on Document Storage Success Case LLD
David	No	I was able to make automatic emailing system to send OTP.	I am going to work on the admin account recovery proccess.
Sierra	No	Researched and updated my API with controllers, data, and models and added my javascript project to visual studio code to test	Add fetch ajax calls to my javascript file

2/19/2023	Are you Blocked?	What did you do yesterday?	What are you going to do today?
Abhay	No	Continued research on the Tests, and created some Tests.	Take the console app made last milestone and use controllers to connect it to the frontend.
Anh	No	refactor logging design	usercontroller is injection logging and successfully logs to a csv file
Aster	No	I have finished about halfway past the Document Storage Success Case LLD	Finish making Document Storage Success Case LLD
David	No	I was able to make the admin account recovery process to allow admin to approve or deny requests.	I will work on optimizing code to better follow SOLID Principles.
Sierra	Yes	Finished creating database and adding ajax calls via fetch to the javascript	Research how to make my user input go into the database instead of it just listing the type.
